Lightning talks: Odum School research

ODUM FACULTY

UGA Odum School of Ecology
Brief introductions to research by Odum faculty

17-SEP

Disentangling host traits and social context in behavioral disease ecology

NICK KEISER
University of Florida
Assistant Professor, Biology

1-OCT

What doesn’t bend: Responses to environmental heterogeneity in two marine invertebrates

MORGAN KELLY
Louisiana State University
Assistant Professor, Biological Sciences

15-OCT

Immunological variability: A missing link in disease ecology

MAURICIO SEGUEL
Odum School of Ecology
Postdoctoral Research Associate

29-OCT

Imperfect fixes: Costs of adaptive responses of lizards and frogs to invasive predators and novel noise

TRACY LANGKILDE
Penn State University
Professor and Head, Biology

19-NOV

Whither the naturalist in the age of genomics?

MANUEL LEAL
University of Missouri
Professor, Biological Sciences

POSTPONED

Competition across space: From protist microcosms to body-snatching parasites

EMLYN RESETARITS
UGA Center for the Ecology of Infectious Diseases
Postdoctoral Research Associate

8-OCT

Journey of the Juncos: Migration and adaptation in our changing world

ELLEN KETTERSON
Indiana University
Distinguished Professor, Biology
Director, Environmental Resilience Institute

22-OCT

Wildlife responses to urbanization and resource provisioning: White Ibis in South Florida as a case study

SONIA HERNANDEZ
UGA Warnell School of Forestry and Natural Resources
Professor, Wildlife Disease and Wildlife

5-NOV

How evolutionary processes affect ecosystems: An interdisciplinary perspective

RANA EL-SABAAWI
University of Victoria
Associate Professor, Biology

3-DEC
